I am currently seeking a challenging position, enabling me to utilise my wealth of skills and experience gained throughout my career. Further reading may help clarify my professional proficiency as an intelligent, accomplished Site Engineer/Section Manager. I have vast experience in many functions of the construction environment, from conception to completion throughout my career, predominantly:

- Analyzed Technical information to make accurate calculations, set out coordinated points, line and level, which enabled accurate construction on various projects.
- Acquired strong time management and prioritizing skills working in pressurized environments and dealing with sub-contractors requirements.
- Engineered and helped manage many construction projects from conception to completion, within budget, time constraints using leading edge methodologies to ensure resource targets are met, adhering to Health, safety and welfare guidelines.
- Excellent analytical and problem solving skills to ensure accurate identification of key components, logical sequence of operations needed for systematic resolve.
- Proficient with all aspects of construction; - Soil Analysis, Piling, Sewerage treatment plants, Invert lift pumps, Drainage, Attenuation devices, Substructure, Foundations, Setting bolts, Columns, Beams, Reinforcement, Formwork, Portal frames, Steelwork, Cladding and Glazing systems, Superstructure.
- Design and build capable to client requirements, with the ability to subsequently provide a detailed project specification, program of works, design calculations, sub contract liaison, attend update meetings and ensure project deliverables are adhered to

## Objective

Utilizing the wealth of experience gained in the construction industry, completing numerous projects of complexity, substantial size and stature. I am now seeking to further my career, within an organization, company or sub contract division who are looking to, use the service I have provided, improve, expand into the market or add to their existing construction professionals. I welcome the opportunity for engagement of services, suitable to my experience with a view to engage on a construction project on a temporary, contract or permanent basis. Should my experience prove of interest, with a view to profit from efficiencies' then please don't hesitate to contact me. Mobile: 07922252330

## Profile

I am a hard working team player, working to targets, deadlines, proficient at all depths (ground works and substructure) and heights (superstructure) meeting the high standards of today's construction environment. I always perform well as an individual, very reliable, trustworthy and punctual. I am not adverse to long hours, nights or weekend work and always look to improve performance if possible. I have been held in high esteem by previous employers, from which references can be sort if desired. Years of project and construction experience, proficient with CDM requisites, site setting out and engineering requirements, managing and Construction experience, within design, construction and installation of domestic, commercial and infrastructure projects.

## Profile explained

A Proficient Construction Engineer and Manager with over 24 years construction experience on contracts of all shapes and sizes, with considerable experience in strategy, techniques, methodology and a thorough approach with the ability to resolve complex problems. Utilises excellent communication skills, maintaining records, updates and develops strong working relationships with colleges at all levels. Enjoys outdoor work, though adept with the requirements of an efficient office, accurate, pro-active and concise. Excellent data sourcing methodology for transposition, manipulation and storage, essential techniques for graphing from a Station and absorbing required information from project files. Site supervisor and management certified accredited by the new CSCS 2010 test.
